APPLICATION FOR TRAINEESHIP AND THESIS

To whom it may concern,

I am a second year Master's degree student in Computer Engineering (Software specialisation) at the Polytechnic University of Turin, Italy.
I am planning to move to Aarhus next semester so I can write my thesis and I am therefore looking for a Student traineeship at AU starting in February/March 2024.

During my Bachelor's and Master's studies, I had the opportunity to gain knowledge in the computer industry and learn different technologies, as mentioned in my resume. I also participated in practical projects that allowed me to apply my skills.

This semester is providing me with a valuable opportunity to enhance my teamwork skills. I am currently involved in a project managed using the Scrum methodology, which has been instrumental in introducing me to Agile practices.
Another project I'm currently taking part in is the design of a sports and wellness-oriented application in collaboration with my Human-Computer Interaction group. The application is meticulously designed based on usability principles, with the ultimate goal of implementing it.
Furthermore, I am part of a group developing a screen capture application using Rust.

I am confident that the Aarhus University can provide numerous opportunities for my personal and professional development in a dynamic and inspiring setting. There are some areas I am more familiar with, such as Software architecture, Human-centric Computing, and Innovation through technology, but I am open to new and challenging proposals.

Thank you for your time and I look forward to hearing from you soon.

Sincerely,

Vanessa Scherma
